Measure Smart, Ship Smarter.

Product Overview

ScanDim360 is a smart, automated package dimensioning and weighing solution designed for warehouses, logistics providers, and e-commerce fulfillment centers. With two flexible variants, businesses can choose between a cost-effective standalone model or a fully connected enterprise-ready system.

Simple, affordable, and perfect for small businesses

Key Features:

- Accurate dimension and weight measurement.
- 20x4 LCD display showing Dead Weight, Dimensions, Volumetric Weight, and Final Billed Weight.
- Completely offline, no internet or PC required.
- Compact size – 60 x 60 x 40 cm platform.
- Optional thermal printer for slip printing.

Ideal For:

- Local courier companies
- Small warehouses
- Small e-commerce businesses

Pricing Structure

Upgrade Path

Existing Standalone Variant customers can upgrade to Web-Connected Version by adding:

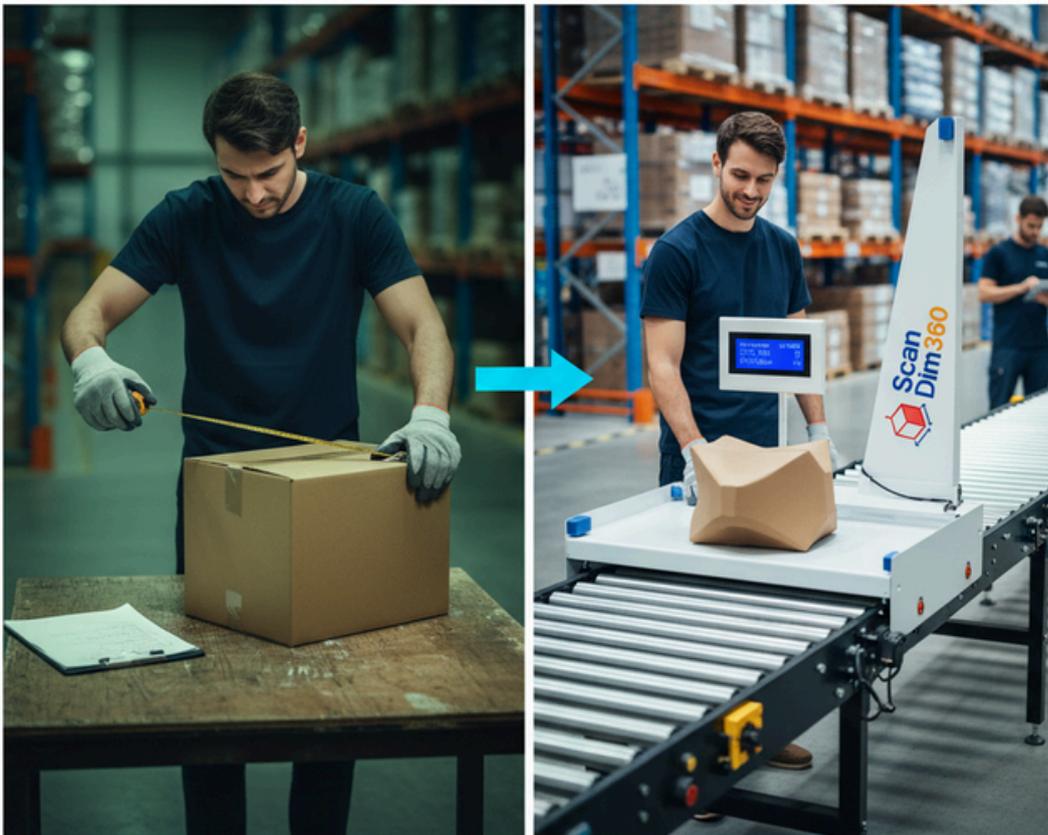

- Camera Module
- PC/Web Software License
- Cloud Subscription

Sample JSON Output (For API Integration)

```
"awb": "AWB123456",  
"dead_weight": 5.62,  
"length": 40,  
"width": 35,  
"height": 25,  
"volumetric_weight": 7.00,  
"final_weight": 7.00,  
"timestamp": "2025-09-11T10:15:00"
```

Why Choose ScanDim360

- Accuracy: Reduces shipping cost disputes by providing precise dimensions and weights.
- Scalability: Choose offline or online version as per your business size.
- Automation: Save time with auto photo stamping, reporting, and API integration.
- Future-ready: Upgrade anytime as your business grows.
